Subject: new comment provided to docket on USOR - final version of draft they handed out to region.

There weren't that many differences from the original draft comments, but the comments were more explicit we needed to consider current conditions. They also had an attachment saying the site was no longer abandoned and outlining all their cleanup activities. I believe this attachment is very similar to the attachment in their original comments, but I didn't go over it real carefully. Here is the scanned comment.
